- Cleanses away whiteheads and blackheads
- Clinically effective for skin toning
- Refines appearance of large pores
- Reversible ultra slim suction cup
- Wet/Dry and rechargeable

**CAUTION:**  
READ ALL THE INSTRUCTIONS BEFORE OPERATING THIS PRODUCT.  
It is important to exercise care when using this product in order to achieve satisfactory results and to reduce risk of temporary skin discoloration. If you are concerned about how your skin might react, we suggest that you test the product on a part of your body that is not normally exposed. It is recommended that you first start the application for no longer than two seconds on each area of your skin, then gradually increase the time to no longer than one minute as you gain experience. Do not use the Pore Cleanser on pimples, blisters, sunburned or broken skin or on skin inflammations. Please refer to the instruction manual for correct usage techniques on different parts of the face.

Pore Cleanser with Mist

Continuous micro-fine mist helps ensure the suction cup stays on your skin tightly to remove oil and dirt from the pores.

Without Mist

Gaps between the suction cup and the skin allowed air to enter resulting in a loss of suction force.

With Mist

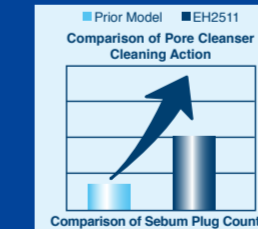

Now a continuous spray of fine mist seals the surface between the suction cup and the skin.

The sealing effect of the fine mist spray enhances suction power for cleaner, healthier pores.

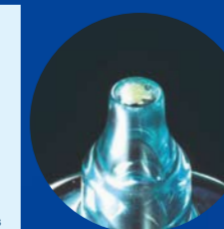

Removes 3 Times\* as Much Sebum as Before

Enhanced suction provides a refreshing, clean sensation you can really feel. Once you begin using the Pore Cleanser regularly you'll be on your way to blackhead-free skin.

\*In comparison to Previous model EH2501

Results of survey by Panasonic. \*Results will vary from person to person. \*\*both models use 400Pa suction pressure

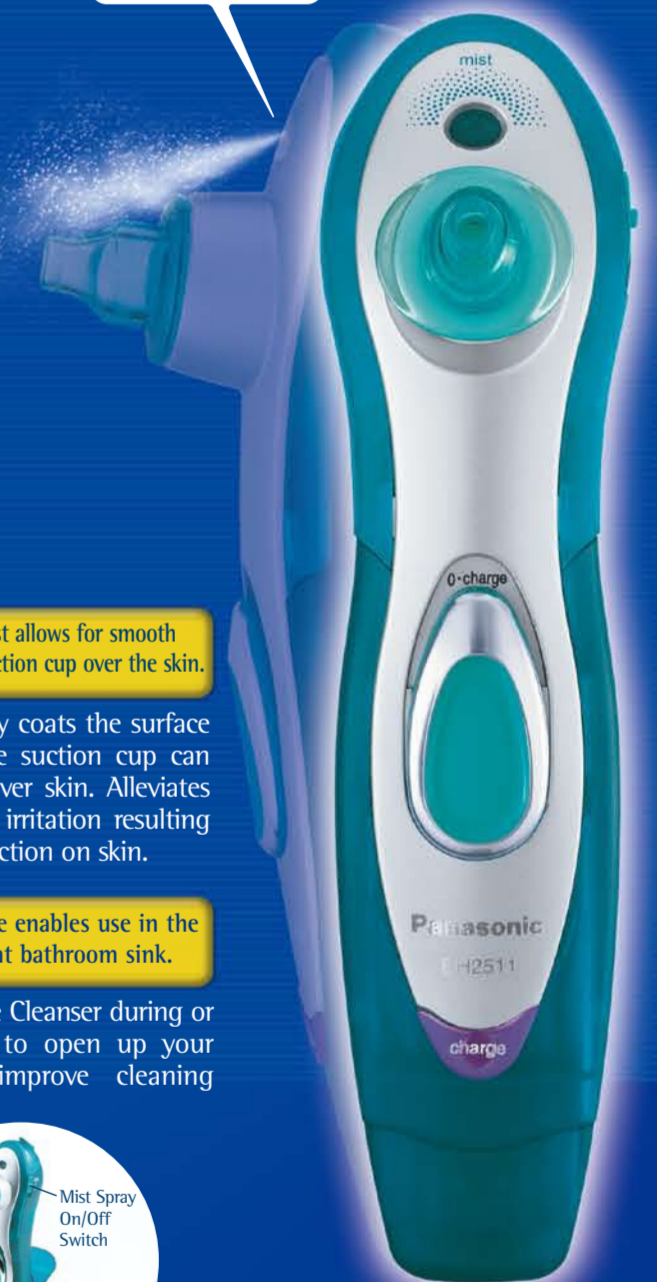

Micro-fine mist allows for smooth movement of suction cup over the skin.

Fine mist spray coats the surface of skin so the suction cup can gently glide over skin. Alleviates potential skin irritation resulting from pulling action on skin.

Wet/Dry usage enables use in the shower or at bathroom sink.

Using the Pore Cleanser during or after shower to open up your pores and improve cleaning effectiveness.
