the Genius Prestige

Countertop/Built-in Microwave Oven

Genius Prestige Microwave

With the touch of our **Sensor Cooking** button, this microwave takes guesswork out of creating a great meal, by automatically setting power levels and adjusting cooking or defrosting time. The sensor measures the amount of steam produced during cooking, and signals the microprocessor to calculate the remaining cooking time at the appropriate power level automatically.

INVERTER Technology

Panasonic **Inverter Technology** perfects the art of cooking with microwave ovens, delivering delicious flavor, excellent color, superb shape and texture in the foods you cook. The consistent delivery of microwave energy means delicate foods can simmer without the edges and surfaces overcooking. Foods have the look, nutrient level and taste you expect – without the wait!

Menu Action Screen (multi-lingual)

The Menu Action Screen is like having a chef to assist you in the kitchen. It scrolls step-by-step cooking instructions across the display, in a choice of English, Spanish or French.

Inverter Turbo Defrost™

Panasonic evolved the Turbo Defrost™ feature, which allows you to defrost foods even faster than previous Panasonic Auto Defrost. Panasonic Inverter Turbo Defrost technology is an advanced microwave sequencing system using the inverter continuous-power delivery method.

Keep Warm Feature

A pulsing delivery of very low microwave power keeps food temperatures at a constant level – without overcooking. So, foods like stew, gravy and desserts remain warm in the oven until ready to serve.

One-Touch Genius Sensor Cook and Reheat

The Genius Prestige Sensor adjusts power levels and calculates cooking and reheating times automatically for various food types.

Control Panel with Blue LED Dial Ring/Blue Backlit Display

The silver button control panel, illuminated neon blue spin dial and generous 6-digit expanded backlit display provide a high-end look and a practically effortless navigation experience in the kitchen.
